

Dear FCC,
I am writing to you in response to the recent attempt by the NAB to use their lobbyists to limit the use of XM and satellite radio to broadcasting weather and traffic services.

It is just another attempt by radio and TV stations trying to monopolize their markets and not allowing free enterprise to do business in their areas. Especially where radio reception is so poor, Satellite radio is a must. Plus the fact I don't mind paying for it as well. The service it provides is outstanding!

The FCC should encourage free enterprise amongst its membership.

Thank you for your consideration,

Peter Switzer
